#### **Description**

Medical necessity criteria for multiplex respiratory polymerase chain reaction (PCR) testing.

#### Policy/Criteria

- It is the policy of WellCare of North Carolina® that respiratory viral panels (RVPs) testing for five pathogens or fewer are considered **medically necessary** when meeting all of the following<sup>1-8</sup>:
  - **A.** The member/enrollee has one of the following clinical indications for infectious disease testing:
    - 1. The member/enrollee is immunocompetent, and the clinical indication includes a presumption of active infection or infection-associated complications (which may include exacerbation of underlying disease) that require the identification of a causative organism for appropriate management. Note: Atypical clinical presentations of disease are considered appropriate indications for special populations who may not present with classic symptoms of infection (i.e., the elderly);
    - 2. The member/enrollee is immunocompromised (i.e., those with weakened immune systems including those with human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS), those who are taking immunosuppressive medications (i.e., chemotherapy, biologics, transplant-related immunosuppressive drugs, high-dose systemic corticosteroids) and those with inherited diseases that affect the immune system (i.e., congenital immunoglobulin deficiencies). Note: atypical clinical presentations of disease are considered appropriate indications for testing. In this population, testing may be performed once as part of a pre-transplant evaluation, regardless of the presence of symptoms;
  - **B.** The results of testing will impact clinical management in a manner already demonstrated in the peer-reviewed published literature to improve outcomes;
  - C. Testing is performed according to the intended use of the test in the intended population for which the test was developed and validated;
  - **D.** Targeted testing is not appropriate (i.e., will not provide sufficient information for the appropriate clinical management);
  - **E.** The panel performed includes at least the minimum pathogens required for clinical decision making for its intended use that can be reasonably detected by the test;

- **F.** The registered test demonstrates equivalent or superior test performance characteristics analytical validity (AV) and clinical validity (CV) to established standard-of-care (SOC) methods (i.e., culture, pathogen-specific PCR) for the majority of targets included on the panel;
- **G.** Documentation of the following is clearly stated in the medical record:
  - 1. Specific clinical indications for testing (i.e., clinical suspicion of a pathogen as the cause of the medical condition);
  - 2. Specific reasons for performing panel testing;
  - 3. Provider type/specialty and Place of Service.
- II. It is the policy of WellCare of North Carolina® that RVPs testing for six pathogens or more are considered **medically necessary** when meeting the following:
  - **A.** The criteria in section I are met, and any of the following:
    - 1. Performed in a healthcare setting that cares for critically ill individuals, such as the emergency department or inpatient hospital, and includes those in observation status;
    - 2. Member/enrollee is immunocompromised, as defined in section I.A.2.;
    - 3. Member/enrollee is immunocompetent and both of the following:
      - a. A severe and established underlying respiratory pathology is present (i.e., severe asthma, chronic obstructive pulmonary disease (COPD), cystic fibrosis, pulmonary fibrosis, radiation therapy to the lung).
      - b. Treatment with antibiotics may be indicated according to established guidelines. 18-19

#### Background

Polymerase chain reaction (PCR) respiratory viral panels (RVP) may detect the RNA or DNA of multiple types of respiratory viruses as a single test, often through a nasal, nasopharyngeal, or oropharyngeal swab. Viral pathogens are the most common cause of respiratory tract infections. Rhinovirus, parainfluenza virus, coronavirus, adenovirus, respiratory syncytial virus (RSV), Coxsackie virus, human metapneumovirus, and influenza virus account for most cases of viral respiratory infections. Immunocompromised patients can develop severe lower respiratory tract infections from common respiratory viral pathogens that otherwise cause mild upper respiratory tract infections in healthy patients.

PCR testing is generally effective for confirming respiratory viral infections with very high sensitivity and specificity.<sup>8,12</sup> Respiratory viral infections often have nonspecific clinical presentations and, therefore, accurate and timely identification through PCR testing has the potential to optimize antiviral use when appropriate, decrease the spread of any viral infection, and to reduce the number of patients being treated with antibiotics unnecessarily.<sup>9, 13-16</sup> Multiplex PCR testing can detect a variety of respiratory viruses depending on the type and brand of testing being used.<sup>13</sup> However, the diagnostic role and importance of these multi-pathogen panels in identifying specific viruses in the setting of a respiratory infection is quite limited because the care and management of the individual patient is rarely altered based upon the pathogen identified.<sup>17</sup>

#### Infectious Disease Society of America (IDSA)

The IDSA recommends that "clinicians should use multiplex RT-PCR assays targeting a panel of respiratory pathogens, including influenza viruses, in hospitalized immunocompromised patients." Further, "clinicians can consider using multiplex RT-PCR assays targeting a panel of respiratory pathogens, including influenza viruses, in hospitalized patients who are not immunocompromised if it might influence care (e.g., aid in cohorting decisions, reduce testing, or decrease antibiotic use)."<sup>7(pg. 898)</sup>

Table 1: CPT codes that support medical necessity in any place of service, without diagnosis code requirements

CPT®*	Description
Codes	
87631	Infectious agent detection by nucleic acid (DNA or RNA); respiratory virus (e.g.,
	adenovirus, influenza virus, coronavirus, metapneumovirus, parainfluenza virus,
	respiratory syncytial virus, rhinovirus), includes multiplex reverse transcription, when
	performed, and multiplex amplified probe technique, multiple types or subtypes, 3-5
	targets.

Table 2: CPT codes that support medical necessity when billed with place of service codes in table 3, or a diagnosis code in both table 4 and table 5.

CPT®*	Description
Codes	
0115U	Respiratory infectious agent detection by nucleic acid (DNA and RNA), 18 viral types and subtypes and 2 bacterial targets, amplified probe technique, including multiplex reverse transcription for RNA targets, each analyte reported as detected or not detected
0202U	Infectious disease (bacterial or viral respiratory tract infection), pathogen-specific nucleic acid (DNA or RNA), 22 targets including severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), qualitative RT-PCR, nasopharyngeal swab, each pathogen reported as detected or not detected
0223U	Infectious disease (bacterial or viral respiratory tract infection), pathogen-specific nucleic acid (DNA or RNA), 22 targets including severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), qualitative RT-PCR, nasopharyngeal swab, each pathogen reported as detected or not detected

CPT®*	Description
Codes	
0225U	Infectious disease (bacterial or viral respiratory tract infection) pathogen-specific DNA
	and RNA, 21 targets, including severe acute respiratory syndrome coronavirus 2
	(SARS-CoV-2), amplified probe technique, including multiplex reverse transcription for
	RNA targets, each analyte reported as detected or not detected
87632	Infectious agent detection by nucleic acid (DNA or RNA); respiratory virus (e.g.,
	adenovirus, influenza virus, coronavirus, metapneumovirus, parainfluenza virus,
	respiratory syncytial virus, rhinovirus), includes multiplex reverse transcription, when
	performed, and multiplex amplified probe technique, multiple types or subtypes, 6-11
	targets
87633	Infectious agent detection by nucleic acid (DNA or RNA); respiratory virus (e.g.,
	adenovirus, influenza virus, coronavirus, metapneumovirus, parainfluenza virus,
	respiratory syncytial virus, rhinovirus), includes multiplex reverse transcription, when
	performed, and multiplex amplified probe technique, multiple types or subtypes, 12-25
	targets

Table 3: Place of Service Codes Supporting Medical Necessity for codes in Table 2

Place of	Place of	Place of Service Description
Service	Service	
Code	Name	
19	Off Campus-	A portion of an off-campus hospital provider based department
	Outpatient	which provides diagnostic, therapeutic (both surgical and
	Hospital	nonsurgical), and rehabilitation services to sick or injured persons
		who do not require hospitalization or institutionalization.
21	Inpatient	A facility other than psychiatric which primarily provides
	Hospital	diagnostic, therapeutic (both surgical and nonsurgical), and
		rehabilitation services by, or under, the supervision of physicians to
		patients admitted for a variety of medical conditions.
22	Outpatient	A portion of a hospital which provides diagnostic, therapeutic (both
	Hospital	surgical and nonsurgical), and rehabilitation services to sick or
	(Observation)	injured persons who do not require hospitalization or
		institutionalization.
23	Emergency	A portion of a hospital where emergency diagnosis and treatment
	Room –	of illness or injury is provided.

#### North Carolina Guidance

Eligibility Requirements

- a. An eligible beneficiary shall be enrolled in the NC Medicaid Program (Medicaid is NC Medicaid program, unless context clearly indicates otherwise);
- b. Provider(s) shall verify each Medicaid beneficiary's eligibility each time a service is rendered.
- c. The Medicaid beneficiary may have service restrictions due to their eligibility category that would make them ineligible for this service.

EPSDT Special Provision: Exception to Policy Limitations for a Medicaid Beneficiary under 21 Years of Age

a. 42 U.S.C. § 1396d(r) [1905(r) of the Social Security Act] Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) is a federal Medicaid requirement that requires the state Medicaid agency to cover services, products, or procedures for Medicaid beneficiary under 21 years of age if the service is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition [health problem] identified through a screening examination (includes any evaluation by a physician or other licensed practitioner).

This means EPSDT covers most of the medical or remedial care a child needs to improve or maintain his or her health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

Medically necessary services will be provided in the most economic mode, as long as the treatment made available is similarly efficacious to the service requested by the beneficiary's physician, therapist, or other licensed practitioner; the determination process does not delay the delivery of the needed service; and the determination does not limit the beneficiary's right to a free choice of providers.

EPSDT does not require the state Medicaid agency to provide any service, product or procedure:

- 1. that is unsafe, ineffective, or experimental or investigational.
- 2. that is not medical in nature or not generally recognized as an accepted method of medical practice or treatment.

Service limitations on scope, amount, duration, frequency, location of service, and other specific criteria described in clinical coverage policies may be exceeded or may not apply as long as the provider's documentation shows that the requested service is medically necessary "to correct or ameliorate a defect, physical or mental illness, or a condition" [health problem]; that is, provider documentation shows how the service, product, or procedure meets all EPSDT criteria, including to correct or improve or maintain the beneficiary's health in the best condition possible, compensate for a health problem, prevent it from worsening, or prevent the development of additional health problems.

#### **EPSDT and Prior Approval Requirements**

- 1. If the service, product, or procedure requires prior approval, the fact that the beneficiary is under 21 years of age does NOT eliminate the requirement for prior approval.
- 2. **IMPORTANT ADDITIONAL INFORMATION** about EPSDT and prior approval is found in the *NCTracks Provider Claims and Billing Assistance Guide*, and on the EPSDT provider page. #### **Important Reminder**

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members/enrollees. This clinical policy is not intended to recommend treatment for members/enrollees. Members/enrollees should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members/enrollees and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers,

members/enrollees and their representatives agree to be bound by such terms and conditions by providing services to members/enrollees and/or submitting claims for payment for such services.
